PROFILE

I am a passionate Junior Software Developer with an undergraduate degree in Bachelor of Science in Software Development from KCA University (Completed coursework in December 2021) – Awaiting graduation. I have gained experience through personal projects and internships where I have learnt hands-on coding, software development processes, programming frameworks(Django & ReactJS), user interface design, testing and debugging, working and collaborating with teams. *I am excited to learn and grow in software development and currently looking for a role as a Junior Software Developer or Internship and available to start in January 2022.*
